PROFILE

I am a motivated Computer Engineering student at KNUST with a strong interest in technology, innovation, and community development. I am passionate about using engineering solutions to address real-world challenges, and I have demonstrated initiative through various tech projects and volunteer work. With strong communication and leadership skills, I aim to apply my knowledge and creativity to impactful projects and contribute meaningfully to the engineering profession.

EDUCATION

BSc. Computer Engineering **Expected September 2027**
Kwame Nkrumah University of Science and Technology (KNUST), Kumasi, Ghana

W.A.S.S.C.E (Science) **March 2021 – September 2023**
Opoku Ware School, Santasi, Kumasi, Ghana

ACHIEVEMENTS/AWARDS

Participant, UITS Software Development Bootcamp

Kwame Nkrumah University of Science and Technology (KNUST), Oct 2024

- Participated in a hands-on training program organized by University Information Technology Services (UITS), covering:
- Database Administration Fundamentals
- Database Modelling and Design
- Programming in C#
- Web Application Development in MVC with ASP.NET Core
- Capstone Project

Participant, Technology Week Celebration (TWEET '24)

Department of Computer Engineering, KNUST, 2024

Participated in technology-focused workshops and activities organized by the Department of Computer Engineering to promote innovation and interdisciplinary collaboration.

Certified in SQL (Basic)

HackerRank, 2025

Successfully completed the SQL (Basic) skills certification, demonstrating foundational proficiency in querying, filtering, and manipulating data in relational databases.

Microsoft 365 Ecosystem Certification

Coursera, 2025

Completed a course on the Microsoft 365 Ecosystem, gaining knowledge in cloud productivity tools, collaboration platforms (e.g., Teams, OneDrive, SharePoint), and administration fundamentals.

Complete Ethical Hacking Course 2025: Go From Zero to Hero

Udemy, 2025

Covered ethical hacking techniques using Nmap, Wireshark, Hydra, and Metasploit. Practiced Wi-Fi penetration testing and exploitation on Android and Windows systems for educational purposes.

Best Student – Year 1 & Year 2

Atimtim D/A Experimental Junior High School (JHS)

Recognized as the top-performing student for two consecutive academic years based on overall academic excellence and leadership.

PROJECTS/RESEARCH EXPERIENCE

Wi-Fi Voucher Website for Local ISP

Computer Engineering Project — 2025

- Designed and developed a website to automate the sale and distribution of Wi-Fi vouchers for a local internet service provider.
- Integrated Paystack for secure online payments and used Supabase to manage voucher data.
- Implemented user-friendly features such as email delivery of vouchers and responsive layout using HTML, CSS, and

JavaScript.

- Focused on accessibility and improving customer experience while learning full-stack web development fundamentals.

Arduino-Based Traffic Light Control System

Individual Project

- Designed and developed a functional traffic light system using the Arduino Uno microcontroller
- Programmed timing logic in C/C++ to manage light cycles (red, yellow, green) for multiple intersections
- Simulated and tested the circuit using Proteus to verify real-time behavior and logic accuracy
- Integrated LEDs, resistors, and timers to replicate real-world traffic control scenarios
- Demonstrated understanding of embedded systems, hardware interfacing, and control logic

LEADERSHIP

Assistant General Secretary

Opoku Ware School (BZ Year Group)

February 2025-Date

SKILLS AND ABILITIES

Programming Languages

- Proficient in: C, C++, C#, SQL
- Web development: HTML, CSS

Software & Tools

- LaTeX – for professional document formatting and academic writing
- Proteus – for circuit simulation and microcontroller design
- Arduino IDE – for embedded systems programming and prototyping
- Visual Studio, Git/GitHub, SQL Server Management Studio

Database & Backend Development

- Strong knowledge of relational databases and SQL querying
- Experience in database design, normalization, and administration
- Backend development using ASP.NET Core (MVC framework)

Electronics & Embedded Systems

Skilled in circuit design using Arduino and Proteus

Cloud & Productivity Tools

- Knowledge of the Microsoft 365 Ecosystem (Teams, SharePoint, OneDrive, and administration basics)
- Comfortable using cloud-based collaboration and productivity tools

Core Strengths

- Strong problem-solving and critical thinking
- Practical, project-based experience in software and hardware integration
- Fast learner with a growth mindset and attention to detail
- Able to work both independently and as part of a collaborative team

REFEREES

Dr. Thomas Kwaku Agyemang

KNUST

Lecturer, Department of Fisheries and Watershed Management

Phone: +233 543684825

Dr. Andrew Agbemenu Selasie

KNUST

Lecturer, Department of Computer Engineering

Phone: +233 204608600
